

Regional Funding

Open for business ventures

We are a privately-run agency with decades of experience in business consultancy. We offer tailor-made services for companies in Lower Austria with the support of a highly specialised team and a comprehensive network. We provide ideal locations in 17 business parks. Our Technopol Program is designed to strengthen technological development in the region, particularly for educational and research facilities. We also offer access to regional funding and support innovative cooperation projects in the clusters we serve to increase competitiveness. In addition, Austrian companies can count on our support for internationalisation and export.

jobs created

Regional funding

On 1 February 1987, the Regional Funding Program was launched. Since then it has been supporting initiatives and projects of its partners in areas such as consultancy, funding and co-financing with the help of EU funding. Under the Regional Funding Program, As part of our regional funding efforts, we back businesses, local authorities, initiatives and associations as well as individuals with project initiatives that contribute positively to the regional economy. Projects supported are anchored in and connected to the regions. They utilize regional resources, resulting in both added value and the creation and safeguarding of jobs in the regions. The ecoplus Regional Funding Program may include funding from the EU Rural Development Fund (LE/LEADER 2014-2020).

Our key areas of funding

- Construction and expansion of tourist infrastructure (e.g. cycle routes, winter sports facilities)
- Building and expansion of tourist facilities
- Improving the quality of tourist attractions (e. g. natural parks, botanical gardens, theme parks, cultural highlights)
- Measures necessary due to demographic change
- Construction and expansion of technology and research centers
- Development of business and commercial areas
- Expansion of the exhibition centers Wiener Neustadt, Tulln and Wieselburg
- Projects within the framework of LE/LEADER 2014-2020

Hochkar 360° Skytour

Since 2015, the skywalk at Hochkar mountain station offers visitors a unique experience. The goal is to transform a traditional winter sports area into an attractive destination all year round. A higher visitor frequency means better occupancy rates and creates more value for the entire region.

» Lower Austria's highest viewing platform is situated at 1,700 m above sea level and extends 8.5 m out from the mountain's edge into the sky, with a vertical drop of 120 m.«

Fritz Fahrnberger
Mayor of Göstling an der Ybbs

Eis-Greissler

Through cooperation with various service providers from tourism and agriculture as well as regional networking and the use of local resources, an impressive company has established itself in Krumbach.

» Our Eis-Greissler ice cream parlour has become a tourist hotspot in Krumbach within a remarkably short time, which has a positive effect on the entire region.«

The Blochberger family
Blochberger Eisproduktion GmbH

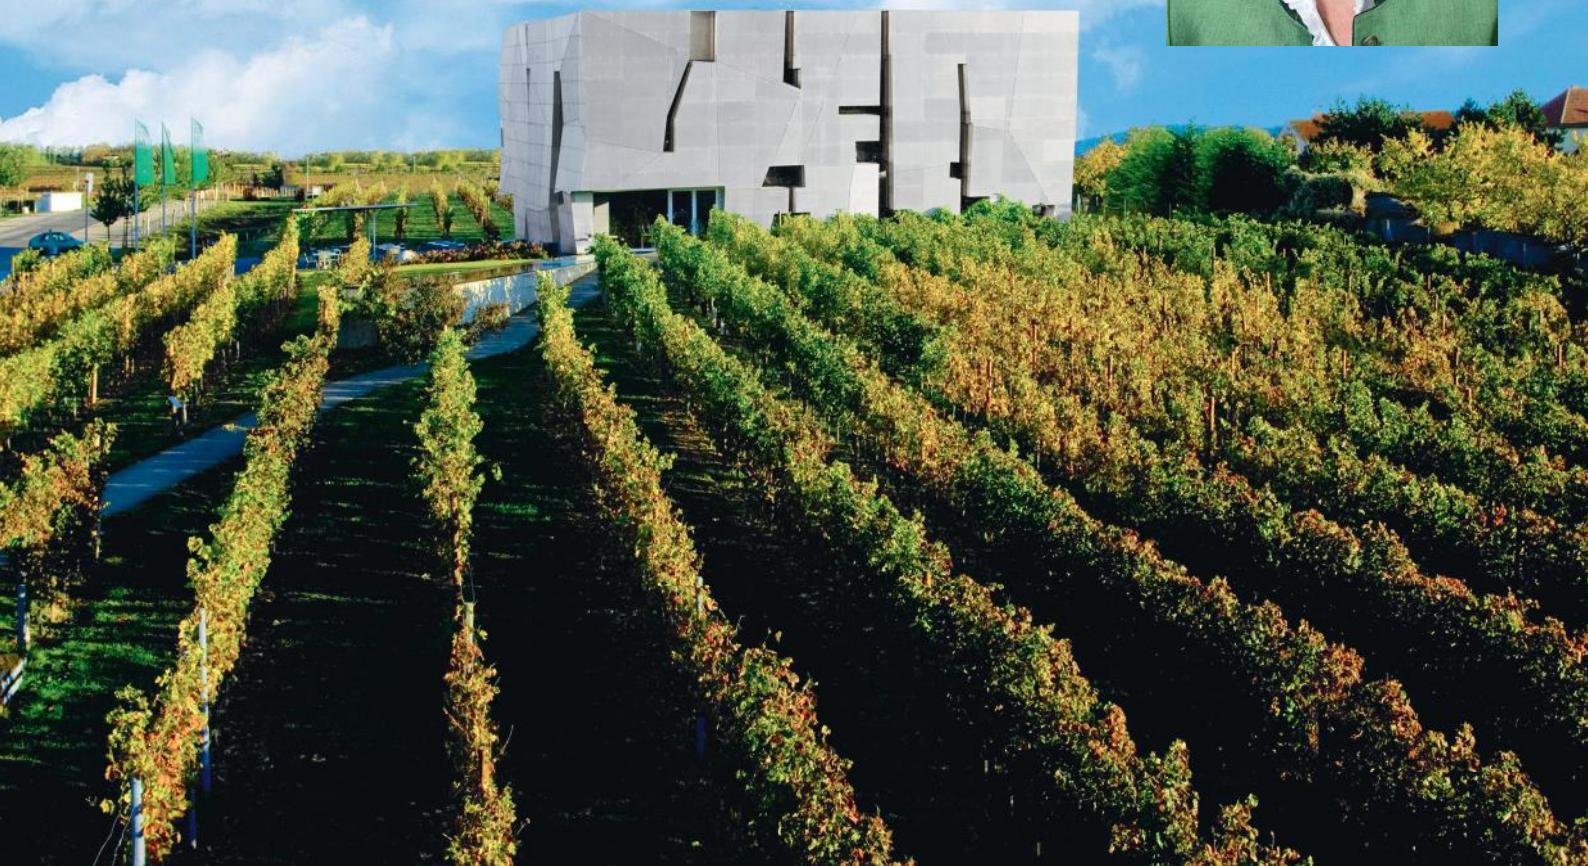

LOISIUM World of Wine

At LOISIUM World of Wine in Langenlois, the largest wine-producing town in Austria, visitors can savour some of the most exquisite wines in the country. By creating this destination for wine and all its pleasures, the image of Kamptal as a tourist destination was completely transformed, with a lasting stimulus for the entire region.

»The best way to enjoy wine is to go where it grows. In order to bring our guests closer to the fascinating world of wine, we are working together to further develop our range.«

*Adelheid Kühmayer
Managing Director
LOISIUM World of Wine*

Therme Laa – Hotel & Silent Spa

The launch of Therme Laa Hotel & Silent Spa introduced a key stimulus for the northern wine region where it is situated. In just a decade, Therme Laa has developed into a comprehensive spa resort with more than four million visitors. Therme Laa now employs 211 members of staff, and also creates many jobs indirectly throughout the region.

»In Therme Laa, we have realised a pioneering project for the northern wine region in collaboration with the Lower Austria federal state government.«

*Ernst Wastler
CEO VAMED*
